No. 1, November 2007

Based on local government boundaries effective March 2008

First release 2006 Census data

Most data from the 2006 Census will be released on a 'place of usual residence' basis – that is, according to where people normally live. For the 2001 Census most data was released on a 'place of enumeration' basis – that is, according to where people were on Census night. However, data on both bases are available from both Census years.

The figures in the table below illustrate the differences between these concepts, and the difference between these and the concept of 'estimated resident population'. For some locations, the number of persons counted at the Census is important because that figure includes visitors. For other areas, or for other purposes, the number of usual residents is a more appropriate measure. In all cases, the estimated resident population (which includes an allowance for persons not counted at the Census) is regarded as the 'official' population (see explanatory notes). Except where indicated, the population data in this fact sheet is based on the place of usual residence, while all dwellings data is based on place of enumeration.

(a) This data is based on place of enumeration.

- The median age in the Moreton Bay region of 36 years was the same as the Queensland median. There is a larger proportion of the population aged under 15 and a smaller proportion aged over 65.
- Household income is \$12 a week higher on average in the Moreton Bay region, while the median mortgage payment each month is about the same. The median rent is about the same as for Queensland in general.
- The proportion of the population with a severe or profound disability is 4.2% compared with the state average of 4.0%.

Comparisons to Queensland (2006)(a)

	LGA	QLD
Median age	36	36
% of population aged under 15	22.5%	20.7%
% of population aged 65 and over	12.0%	12.4%
% with profound or severe disability	4.2%	4.0%
Median income (weekly)(b)		
Individual income	\$466	\$476
Family income	\$1,151	\$1,154
Household income	\$1,045	\$1,033
Median housing loan repayment (monthly)(b)	\$1,309	\$1,300
Median rent (weekly)(b)	\$205	\$200
Average persons per bedroom	1.1	1.1
Average household size	2.8	2.6

- From 2001 to 2006 the proportion of persons who had never been married increased from 27.3% to 28.6%.
- Married persons increased in number by 15,865, but as a share of total persons declined from 55.3% to 53.5%.
- The number who were separated or divorced increased by 24.2%.
- The number of persons living in a de facto relationship increased by 48.7% between 2001 and 2006 compared with an increase of 11.3% for those living in a registered marriage.
- Social marital status is generally assumed to more closely reflect current living arrangements than do figures for formal registered marital status.

Explanatory notes

- Estimated Resident Population (ERP) is derived from census usual residence counts, by making three adjustments: (a) an adjustment for persons in Australia at the time of the Census who were not counted; (b) inclusion of an estimated number of Australian residents who were temporarily overseas on Census night, and (c) an adjustment for births, deaths and migration between 30 June and the Census date (8 August 2006).
- 'Family' is defined as two or more persons (at least one aged 15+) related to each other who are usually resident in the same household, even if one or more (but not all) are temporarily absent, whereas a 'household' comprises all usual residents of a private dwelling. Thus a couple where one partner was temporarily away would be classed as a couple family, not as a lone person.
- Where local government area (LGA) boundaries have changed since 2001, the 2006 and 2001 Census data presented here have been estimated by apportioning statistical local area (SLA) level Census data. The apportionment ratios are based on an analysis of collection district (CD) population, dwellings and land parcels.
- Where indigenous LGAs have been established since 2001, no 2001 Census data are available for these areas. Note that the 2001 data for the LGAs from which they were created are not directly comparable to the 2006 Census data for these LGAs. It is not possible to accurately adjust the 2001 data for these 'parent' LGAs to allow for the separation of the indigenous areas.
- Data on persons by family type are presented on a place of enumeration basis, as the family data on a place of usual residence basis exclude individuals temporarily absent on Census night, although they are taken into account in determining family type, and are included in the usual resident population for the area.
- In making comparisons between 2001 and 2006 for individual categories in a classification, the size of the not stated category should be considered, as in some cases the real change may be obscured or distorted. Likewise the exclusion of some categories of households may distort the change in household characteristics or size.
